

Training your staff, your way...

We understand that companies are unique and sometimes require bespoke and tailored training solutions.

QUAD LMS is a platform that can be designed and adapted to your specific training requirements. The learning management system allows for the design of bespoke online course solutions, and the 'white labelling' of any current courses we offer.

Whether you're looking to develop courseware spanning employee inductions, health and safety, company processes, compliance training, technical training or workplace specific applications - Quad LMS can develop a comprehensive training solution to suit your needs.

QuadLMS

Effective Training, the way you want it...

Create and deliver specific course content with a comprehensive course builder interface

Control course delivery using a back-end administration module

Live reporting

Create and edit user profiles

Assign multiple courses

Assess student certification

Create reports for learning outcomes

Include graphics, audio, video, quizzes and assessments for an interactive learning experience

Partnering with the experts

We offer all our customers a number of support packages with various levels of input from Quadratica; Essential, Premium & Ultimate, so we won't leave you in the dark when it comes to creating and enhancing your own training packages. With our long proven expertise in creating online training courses, we can provide you with the support you require to achieve the outcome you need.

The home of web-based training - courses available world-wide 24 hours a day, 7 days a week

What suits your needs?

Off-the-shelf courses can reduce development costs, but rarely suit all your needs. You may have immediate training requirements and performance targets which need to be met or a unique educational need which somehow doesn't quite get addressed by our extensive catalogue of courseware. In these instances, QuadLMS can augment our inexpensive off-the-shelf library of titles with a bespoke ('customised') solution, specifically built to meet your training needs.

Whether you're looking to develop courseware spanning employee inductions, health and safety, company processes, compliance training, technical training or an application specific to your workplace, we can assist in developing a bespoke training program to address it using QuadLMS.

Quadratica's hosting platform has proven to be stable and available, even under strenuous use and has delivered tens of thousands of courses over a period of many years with continual positive results.

How can we help?

With the purchase of QuadLMS, we offer a number of support packages, along with hosting and media bundles. Each support package is tailored to suit different requirements, with different levels of support and storage.

Discounts are available if support packages are bought in conjunction with media bundles. Contact sales@quadratica.co.uk for details.

 Reporting & Tracking
 30x1hr phone support/year (office hours)
 3GB authoring storage

Quadratica UK

At Quadratica UK we are continually looking for ways to provide our customers with the best functionality, in the most economic format. Training can be expensive, and the quality of instruction can vary from trainer to trainer. Our online training courses deliver high quality training, every time. Scheduling training for a large work force no longer requires the cost of training rooms, or taking staff off the floor. Our courses are available 24 hours a day, 7 days a week, so training can be scheduled around staff availability and convenience.

To keep our clients' training overheads down, we have priced our courses by the unit – if only 2 people require training, our clients only pay for 2 units, whereas a certified instructor will often charge the same amount whether they are training 2 or 20 people.

We provide training managers with the best possible tools to educate their security staff by continually developing ground breaking technologies. Our products are designed with a strong focus on our customers' ever evolving needs and the shifting landscapes of the security industry.
